

ATTENTION

Do you have a heat pump installed at your house or job?
There are benefits!

If your installation date is after
March 4th of 2022, contact:

The Village Clerk: clerk@villageofdelhi.com

Or

Transition Catskills: kz@TransitionCatskills.org

WHY SHOULD YOU DO THIS?

If you come from a Low- and Middle-Income Household, there are special incentives; the threshold is pretty high! Don't wait! Rebate amounts and incentives are always changing so don't miss out!

While you will receive benefits from the village, switching to heat pumps, the village will receive clean energy grants, funding our ability to continue improving our community physically and emotionally.

We've already converted village streetlights to LEDs, saving YOU, THOUSANDS of dollars every year on electric bills!

WHY ARE WE DOING THIS?

We want to encourage the adoption of new, innovative technologies which generate value and savings for the village residents

We can obtain grant funding from NYS Energy Research Development Authority (NYSERDA), saving money for the village

FOR MORE INFORMATION ON INCENTIVES:

When you contact the clerk or transitions,
Leave your address, installer's name & date
of installation.
